Delhi**

ABSTRACT

Introduction

Healthcare is a rapidly growing facet of human need which requires largescale deployment of professionals to ensure a healthy population, in India and across the developing world. Healthcare is visualized as the consequence of interplay between the doctor and his patient, but it is actually the consequence of the contribution of an assembly of both medical and non-medical professionals, The key professionals are those who are exclusively trained to handle the managerial obligations of health, health IT and hospitals. However, there exists a gap between the need and supply of such professionals, and bridging the gap is an urgent necessity. In India, a number of institutes/universities offer courses on health management/administration. The International Institute of Health Management Research, New Delhi, established in 2008 is one of the few institutes in the country, which is uniquely positioned to contribute to bridging this short supply of health professionals. However, since healthcare managerial education is dynamic and evolving, due to new technologies, and emergent health needs there is a need to review and restructure the curricula of the institute. This paper endeavors to review the various modules of first year and second year health stream offered at International Institute of Health Management Research, New Delhi. The goal is to to study the the scope of the curricula offered and examine if it is up to date with the requirement of the sector, is comparable/better than that offered by other institutes/universities in the country and to restructure the curricula, should a requirement exist.

Methods

The review was carried out by undertaking a study of the course objective, learning objective and syllabus plan of each of the modules weighing these inter se, confirming that the health care sector requirement is being met and formulating a sequence of flow to ensure its lucidity and comprehension by the students. In doing so informal interaction was carried out with students, telephonic inputs were obtained from organizations in which students have been placed and an online secondary data review was conducted to compare the syllabus with that of certain Indian and foreign universities offering a course on health management/administration, to ascertain the viability and vitality of the curricula of IIHMR. Additionally, an interaction with Academia Experts too was carried out to obtain their inputs.

Results

The review of the curricula content brought out that the curricula at International Institute of Health Management Research, New Delhi largely met the requirements that a health manager should have. Certain additional modules have been recommended while a few have been deleted and certain topics have been added/deleted for greater competence endowment of students.

Conclusion

This work reviews the curricula offered at International Institute of Health Management Research, New Delhi and recommends restructuring of the syllabus which is up to date with the requirements of the health sector and has a smooth flowing comprehensive structure to enable students to contribute to the betterment of the health of the country and its consequent economic growth.

The certificate is awarded to

Col Sandip Tripathi

in recognition of having successfully completed his

Internship at **IIHMR, New Delhi**

and has successfully completed his Project on

**Review and Restructuring of Modules of First Year and Second Year (Health Stream) of

ACKNOWLEDGEMENT

Nothing in this paper, whether its content or its completion itself, would have been possible but for the unflinching support, indulgent guidance and immense patience of Dr Pradeep Panda, Dean Academics and Student Affairs, IIHMR New Delhi, who remained steadfast in his belief in me, though I myself may have waived at times.

At the same time, it would be amiss of me to not acknowledge his immense insight and hand holding which was singularly responsible for how this paper has been finally presented.

A warm thanks is also due to Shri Tarun Nagpal, Academic Officer, IIHMR, New Delhi who was always willing and present to assist me in any which way that I requested.

Col Sandip Tripathi
