Part B: 30 Marks

CASE STUDY: The pharmacy & dispensing service of a 500 bed government hospital was recently renovated in 2014. You have joined as a mid level hospital administrator 3 months back. This service is also under your administrative control. You observe the following situation in this service.

Long queue in front of the seven dispensing counters.

Frequent fights between the patients and pharmacists increased the waiting time in dispensary.

Large number of patients do not get the medicines prescribed by doctors.

A prescription audit carried out a year back revealed many lacunae.

A week back you nabbed the head pharmacist carrying a bag full of medicines home.

Five children developed measles between 2-3 year of age. They did receive the measles immunization at 9-10 months of age in the pediatric OPD of the same hospital.

Describe the situation and draw a point wise action plan to solve the chaos and streamline pharmacy.
