In the capacity of a hospital professional, focus on the measures you need to initiate for minimizing job stress and also discuss the Basic Engineering services, Types, and Functions.

Part D: Read the following case study and answer the following questions

Case Study: Pharmacy & Dispensing Service (20 Marks)

The pharmacy & dispensing service of a 500 bed government hospital was recently renovated in 20019. You have joined as a mid level hospital administrator 3 months back. This service is also under your administrative control. You observe the following situation in this service.

1. Long queues in front of the seven dispensing counters.
2. Frequent fights between the patients and pharmacists increased the waiting time in dispensary.
3. Large number of patients do not get the medicines prescribed by doctors.
4. A prescription audit carried out a year back revealed many lacunae.
5. Doctors blame the hospital administration for the dispensing & medicine chaos.
6. A week back you nabbed the head pharmacist carrying a bag full of medicines home.
7. Five children developed measles between 2-3 year of age. They did receive the measles immunization at 9-10 months of age in the pediatric OPD of the same hospital.

Describe the situation and draw a point wise action plan to remedy the chaos and streamline pharmacy.
