## **PREFACE**

**The PGDHM course is well structured and integrated course of business studies. The main objective of practical training is to develop skills in studies by supplement to the theoretical study of business management in general. Professors give us theoretical knowledge of various subjects in the institute. But we are practically exposed of such subjects when we get the training in the organization. It is the training through which we came to know that what an organization is and how it works. During this whole training, I got exposure rich and diverse experience and came to know also about the management practices in real and how it differs from those of theoretical knowledge.**

**It is very beneficial to learn research tools and health care delivery system at various levels. I observed the qualitative research techniques with the help of Research Capacity Building Program (RCZI) with Public Health Foundation of India. I understood various functions of health systems by interactions with key stakeholders, policy makers, researchers, academicians and veterinary officials.**

**During my training period I had an overview of qualitative research and did my study and assessment according to the specified format.**

**I have tried to put my best efforts to complete this task on the basis of skills that I have achieved during my studies in the institute.**
